Subject: Eureka Biosolids

Rachel, et al,

I spoke with Lauren Fondahl yesterday about the EPA's role in the biosolids project. She said that they planned to work with the RWQCB in the issuance of a joint NPDES permit that covered the treatment plant as well as the land application of biosolids on Parcel M. The City is in the process of preparing their application for updating and renewing their NPDES permit. I believe that the RWD the City submitted completely described our proposed project. Lauren said that she was waiting for the RWQCB's input on biosolids and that she would be contacting you soon. Please keep me in the loop and let me know if you need any additional information from me. Thanks, SS
